

## Products

The following products may be used to qualify for a LANsense warranty:

- Any LANmark or LANconnect connectivity or cable products
- Any LANsense panels or cords

## Applications & Performance

Nexans LANsense systems are warranted to support the applications and performance levels as detailed in the relevant passive warranty modules.

- **LANmark-5**
- **LANmark-6**
- **LANmark-6A**
- **LANmark-7A**
- **LANmark-OF**

Note : in the event that different categories of components are mixed then the performance of the lower category will apply.

For a more details list of supported applications and drive distances refer to the Nexans Extended Distance Guarantee module.

Applications are only warranted when Nexans LANsense or LANmark patchcords are used.

## Duration

LANsense/LANmark passive cabling systems are warranted for 25 years from date of issue of warranty certificate.

## Exclusions

This warranty applies to the passive structured cabling system only. All active components including analysers and software support are specifically excluded from the 25 year warranty.

Active components are covered by a standard parts warranty in accordance with Nexans Standard Terms and Conditions of Sale.

Software is covered by the specific maintenance agreement purchased.
