

# LANactive Management Software

Aginode LANactive Manager is a centralized software solution to configure, manage and supervise Aginode LANactive switches. The software provides an easy and comfortable way for the operation of all LANactive FTTO and LANactive Industry switches. In case of troubleshooting LANactive Manager provides an extensive setup of information and tools to decrease the debugging time.

## LANactive Management Software

- Management Software for all LANactive switches
- Zero-Touch Configuration
- Web interface
- Extensive diagnostic functionality
- Secure communication between software, switches and clients

## Stand-Alone and Controller Version

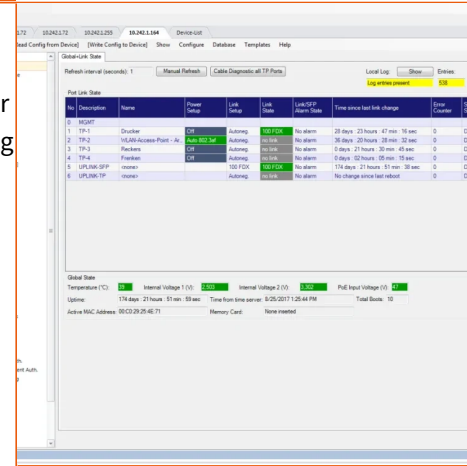

Aginode LANactive Manager is available in two software packages: as local desktop installation for single user or as central server application with a web based frontend and multiple and simultaneous user access.

## Zero-Touch Configuration

Aginode LANactive Zero-Touch Configuration is part of the LANactive Manager in combination with the controller license and is a contemporary way of designing, building and operating networks with minimum effort. The use of LANactive switches in combination with the LANactive Manager ensures networks are fully automated, flexible and scalable. After connecting a Aginode LANactive switch to a network segment, the switch will automatically link to its controller to receive provisioned firmware and configuration.

## Fully Automated Operation

Next to the Zero-Touch Configuration feature, LANactive Manager provides several fully automated tasks e.g. a scheduled configuration or firmware update for all or dedicated devices, a Master-Configuration option or Autodiscovery functionality.

All drawings, designs, specifications, plans and particulars of weights, size and dimensions contained in the technical or commercial documentation of Aginode is indicative only and shall not be binding on Aginode or be treated as constituting a representation on the part of Aginode.

### **Increased Security**

LANactive Manager uses only encrypted and secured communication with the connected LANactive switches to increase the security level and avoid unwanted access to data.

### **Test Version for Evaluation**

LANactive Manager can be downloaded free of charge for evaluation purposes. Compared to the licensed version, the following restrictions apply:

- Delayed starting screen for registration key request
- Maximum five switches can be saved in a database

### **Support Portal**

The LANactive Manager documentation can be loaded via help menu as a PDF file or at the Aginode ANS Support Portal.
