LAN*active* Industry Accessories

- Input Output Option for iGigaSwitch 12xx and 16xx series
- 2 output and 4 input contacts
- 24V DC Output Voltage

Description

Optional I/O interface of iGigaSwitch 12xx and 16xx series allows a fast, simple and low-cost integration of non-IP based devices directly in the field - different sensors, controllers, buttons etc. In combination with the iGigaSwitche, the I/O Module offers extensive management functionalities with interactions, sending of messages as well as the activation of alarms.

Features

Ordering Information	iOption I/O Digital 4xIn 2xOut 230V
Article Number	88301623
Hardware Specifications	
I/O Interface Connector	16-pin terminal block (screw-on type)
Number of Outputs	2
Current/Voltage of Outputs	3A / 30V AC and DC, 500mA / 125V AC and DC, 100mA / 300V AC and DC
Auxiliary Voltage Source	24V DC max. 42mA
Number of Inputs	4
Input Voltage Range	12 … 60V DC
Dry Contacts Support	Yes, via aux voltage
