

WallDrop V2

WINDOW PROTECTION CLIP

Aginode Ref: 13200411

- Part of the Aginode facade solution
- Protects the cable at the fibre cut point
- Accompanies WALLDROP box during the fibre extraction process
- Designed for outdoor use on facade
- Re-usable

The Window protection clip is a part of the Aginode facade solution. It accompanies the WALLDROP facade box during the fibre extraction process.

It is composed of 2 plastic parts:

- one part placed behind the facade distribution cable which supports seals and cable clamping device (plastic ties UV protected provided)
- a second part which ensures the closing of the accessory by 4 clips

The window protection clip uses the same sealing system as the WALLDROP facade box. It is therefore compatible with facade cable from 6 to 12mm (3 sets of slotted seals to cover the range: 6 to 8, 8 to 10 and 10 to 12mm). This reference integrates the seals for facade cable from 10 to 12mm (consult us for applications with different cable diameters).

It guarantees watertightness with cable opening up to 100mm.

Its protection degrees allows an outdoor use on facade (IP55 / IK07).

This accessory has the advantage to be re-enterable in case of future interventions.
